

InterKnowledge is a global technology leader specializing in the design, implementation, and delivery of innovative solutions leveraging both current and emerging Microsoft technologies. The InterKnowledge reputation is built upon the ability to enable clients to capitalize on their strategic investments, maximize efficiency, and focus on their core business competencies.

Through your engagement with InterKnowledge you will be gaining the benefits of first class contacts and high level access into some of Microsoft's most exciting and dynamic business and technology teams. Our Business Analysts work with your stakeholders to identify and refine the goals of your organization. Solutions Architects design the scalable environment that our exceptional engineers build to meet today's needs and future growth. Our experienced Project Managers drive the team from requirements through to delivery, communicating project progress, driving efficiencies and managing all logistical aspects.
